

Sustainability Report

06 February 2025

SİSAN SANAYİ VE TİCARET A.Ş.

Our company's sustainability approach aims to sustainable business to minimizing the environmental impact of our activities and leave a livable world for future generations. In line with this, we continuously strive to protect natural resources, avoid biodiversity loss and minimize waste production by using environmentally friendly production methods.

We make ongoing improvements to increase energy efficiency, reduce water consumption and minimize our carbon footprint in our production processes.

Furthermore, we encourage our business partners in the supply chain to adhere to sustainability principles and collaborate with them to find joint solutions in this regard.

Statement for De-carbonization of Production

SiSAN accepted De-carbonization of Production Report that sets ambitions climate targets* including;

- 10% emission reduction in Scope 1 in overall production each year till 2030,
- 100% emission reduction in Scope 2 till 2025,
- 25% emission reduction in Scope 3 till 2030,
- 25 % emission reduction in Scope1&2&3 overall production by 2030,

And

- 3 % /3 % electricity reduction target by 2025/30
- 100% renewable electricity usage by 2025
- 3 % /3 % fuel/heating reduction target by 2025/30
- 100% renewable/climate neutral fuel/heating by 2030
- 5 % waste reduction per year by 2025
- 25% recycled material (25% plastics, 40% aluminium, 25% steel) by 2025
- Reduce water use in own operations by 50 per cent average per car (compared to 2018 levels)by 2030

Date:06 February 2025

** Compared to 2016-2024 average.*

Targets Status

Target	Target Year	Status/Performance
10% emission reduction in Scope 1 in overall production each year till 2030 (From 2022 absolute energy usage)	2023	Achieved
100% emission reduction in Scope 2 till 2025, (Compared to 2022)	2025	Achieved
25% emission reduction in Scope 3 till 2030,	2030	On Track
25 % emission reduction in Scope1&2&3 overall production by 2025,	2025	On Track
3 % /3 % electricity reduction target by 2025/30	2030	On Track
100% renewable electricity usage by 2025	2025	Achieved
3 % /3 % fuel/heating reduction target by 2025/30	2030	On Track
100% renewable/climate neutral fuel/heating by 2030	2030	On Track
4 % waste reduction per year till 2025	2025	Achieved
5 % waste reduction per year by 2025	2030	In Progress
25% recycled material (25% plastics, 40% aluminium, 25% steel) by 2025	2025	Achieved
Reduce water use in own operations by 50 per cent average per car (compared to 2018 levels)by 2030	2030	In Progress

We aim to be a climate neutral company by 2040

Climate Action

- Minimise emissions from materials
- Minimise operational emissions
- Implementation of energy efficient solutions and other measures to reduce carbon emissions in the supply chain

Circular Economy

- Minimise primary resource use
- Eliminate waste and pollution
- Grow circular business

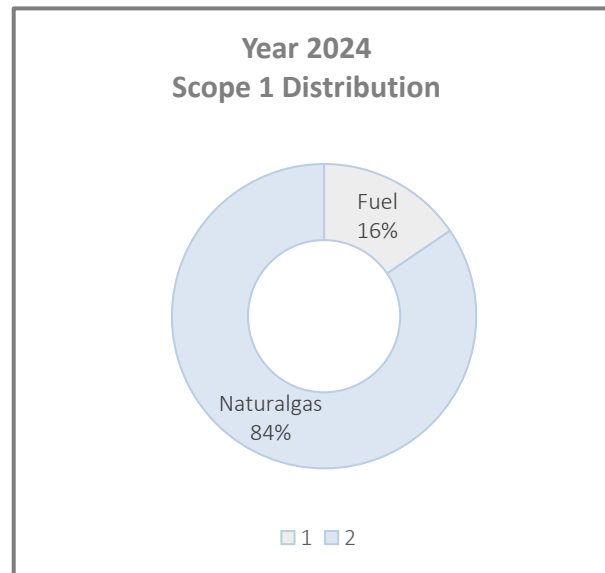

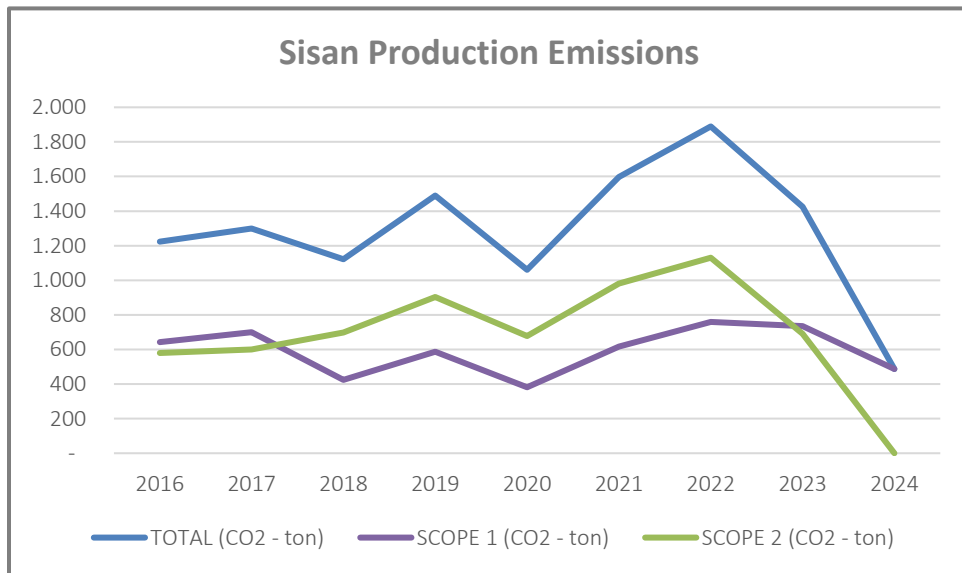

Ethical & Responsible Business

- Full traceability for critical raw materials,
- Sourcing responsible supply chains
- Sustainability equal weight as cost and quality.

Emissions Scorecard

Realization (2016-2024)

*Scope 2: 100% renewable electricity usage by 2024

**Scope 3 :calculation is in progress

Social Responsibility

Labor, Ethics, Occupational Health and Safety Risks

Our company complies with the declared rules/standards regarding labor, ethics, occupational health and safety polycies, in accordance with the law and regulations of the Ministry of Labor and Social Security of Turkey.

Environmental Risks

Sisan track the environmental risks and opportunities, which might impact corporate activities in the short, mid and long term, through indicator values.

Our company complies with the declared rules/standards regarding environmental policy in accordance with the laws and regulations of the Republic of Türkiye Ministry of Environment Urbanization and Climate Change.

Sustainable Development is conducted to “protect, restore and promote sustainable use of terrestrial ecosystems, sustainably manage forests, combat desertification, and halt and reverse land degradation and avoid biodiversity loss”.
